

SOMYA RANJAN TRIPATHI

Software Engineer | AI Infrastructure & Full Stack Developer (<https://srtripathi.netlify.app/>)

Lucknow, India 226002 | +91-8081587619 | somyar.tripathi@gmail.com | github.com/srtsubham | linkedin.com/in/srtsubham

PROFILE

Computer Science Engineer specializing in high-performance **Java backend systems** and **end-to-end AI pipeline development**. Proven capability in architecting **data-driven infrastructure** and deploying **predictive machine learning models** for complex analytical challenges.

EDUCATION

Babu Banarasi Das (BBD) University Lucknow, Uttar Pradesh
Bachelor of Technology in Computer Software Engineering | CGPA: 7.41/10.0 August 2023-September 2027

- Coursework: System Fundamentals, Architectural & Engineering Depth, Project-Specific Electives, Data Structures, Algorithms, and Object-Oriented Design.

Delhi Public School - India Lucknow, Uttar Pradesh
Higher Secondary Education, PCM & Computer Science | Grade: 63.4% July 2018-March 2023

- Coursework: Computer Science Foundations, Database Management Systems, Web Development Fundamentals, Data Manipulation & Logic.

EXPERIENCE

YBI Foundation | Internship Remote, Delhi
Artificial Intelligence & Machine Learning Intern September 2024-November 2024

- Developed and trained the "Valley Prediction Model," utilizing advanced regression analysis on 120,000+ data points to extract structured insights from complex datasets.

GRAShTech | Internship On-site, Lucknow
AWS Cloud Intern September 2024-November 2024

- Architected scalable AWS infrastructure (EC2, S3, VPC, Lambda) and implemented foundational DevOps practices utilizing CI/CD, auto-scaling, and IaC..

ACADEMIC PROJECTS

Campus-Sync: Cloud-Native Synchronization Platform June 2026 - July 2026

- Engineered a containerized synchronization architecture deploying Fast API and React.js via Docker on AWS, reducing cross-platform data latency by 40% and maintaining 99.9% uptime across environments.

LekhaBit Platform: A Scalable SaaS Production Initiative June 2026 - Present

- Spearheaded backend development and open source contributions for a collaborative SaaS application, engineering an architecture designed to scale toward 10,000+ concurrent users.

Ambaram Sentinel: AI Weather Prediction Model on Extreme Weather Events July 2025 - March 2026

- Architected an AI-driven predictive system for extreme weather patterns by implementing regression models capable of processing real-time data ingestion pipelines at 24+ MB/s.

TECHNICAL SKILLS

- Languages/Databases:** Java, Python, JavaScript, MySQL, PostgreSQL, MongoDB, HTML5, CSS.
- Web/App Development:** Spring Boot, Flutter, Next, React, Node, Django, Flask, FastAPI, REST APIs, Streamlit.
- DevOps/Others:** PyTorch, Docker, AWS (CodePipeline, EC2), GitHub Actions, Cloud Infrastructure Essentials.

COURSES & CERTIFICATIONS

- Getting Started with AI on Jetson Nano | NVIDIA** February 2026
- JavaScript Developer | FreeCodeCamp** May 2026
- Foundation: Monitoring Production Agents | Langchain Academy** May 2026

HONOURS & AWARDS

- Advanced Software Engineering Job Simulation (Walmart Global Tech) | Forage** May 2026
- Solutions Architect Simulation (AWS) | Forage** August 2024
- Event President | Delhi Public School, Saheedhpur, Lucknow** November 2022
